

**Orange County Code Chapter 28, Article 5**, requires all Alarm Businesses providing services within unincorporated Orange County after January 1, 2013, to register with the Orange County Sheriff's Office.

Only those businesses that are found to have a current, valid license, issued by the Department of Business & Professional Regulation, and who are in compliance with all applicable requirements of Florida State Statute 489, Part II, will be approved for registration by the Orange County Sheriff's Office.

Alarm Businesses without a current, valid license, and who are found not to be in compliance with the requirements of state and local laws are prohibited from selling, servicing, monitoring, or maintaining any alarm systems within unincorporated Orange County.

The businesses listed below have met the standards required for Registration by the Orange County Sheriff's Office and have been granted authorization to operate a business that sells, installs, repairs and/or monitors Alarm Systems (see section 28-118, Orange County Code) *This list is updated monthly, and is accurate as of 5-1-24.*

**The Orange County Sheriff's Office does not endorse or recommend any particular company.**
